

# Company Profile

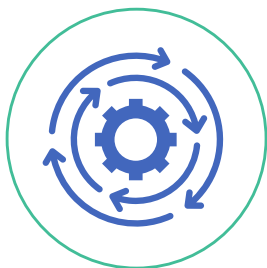

# About 1ai

1ai deliver intelligent process automation. We help organisations discover, digitise, automate and analyse processes with one integrated platform. When they can rely on bots to repeat, run and learn, they are free to think, create and innovate.

With offices in South Africa and a presence in the Netherlands, 1ai is a leading RPA solutions business where we integrate AI and rule-based logic with business processes so that your people and digital workforce work together as a harmonious team.

As an Automation Anywhere Centre of Excellence partner, we deliver RPA as a service. Where designing, implementing, hosting, and support is part of the service we provide.

# What can RPA do for you?

1ai's solutions are designed to streamline business processes by automating tasks that were previously performed manually. Our bots can perform various tasks, from data entry and document processing to financial analysis. Our bots are designed to work alongside employees, allowing organisations to focus on higher-value tasks that require human skills and judgment.

Across industries and business sizes, RPA can take on any repetitive, manual process. When RPA is married with AI technologies, it enables us to reimagine how businesses operate by seamlessly integrating technology, work processes, and people.

**Streamline processes:** RPA can automate repetitive and time-consuming tasks, freeing up employees to focus on higher-value tasks.

**Increase efficiency:** By automating tasks, RPA can significantly reduce the time it takes to complete them, leading to increased efficiency and productivity.

**Improve accuracy:** RPA can significantly reduce errors and improve data accuracy by eliminating manual data entry and other manual tasks.

**Reduce costs:** RPA can reduce the need for manual labour, resulting in significant cost savings for businesses.

**Enhance customer experience:** RPA can help organisations provide faster, more accurate, and more consistent service to customers, resulting in improved customer satisfaction and loyalty.

**Boost innovation:** By freeing up employees to focus on higher-value tasks, RPA can help organisations foster a culture of innovation and creativity.

## Implementation & Support

We provide skilled, experienced, & certified resources to deploy RPA in a robust manner based on the 1ai methodology which has been improved to assist customers over time.

## RPA Health Assessment

We investigate the state of your current RPA deployment, and quickly identify choke points and issues, and provide remedies and advice on how to get it back on track by analysing the infrastructure, resources and methods used.

## Finance Transformation

RPA in Finance streamlines processes, speeds up transactions, and cuts costs. It empowers finance teams for strategic analysis, decision support, driving business growth.

## Automation-as-a-Service

We make it easy for teams to automate and scale critical business operations and finance functions.

Unlike other RPA providers, 1ai offers comprehensive on-demand RPA management throughout the entire customer lifecycle.
